2021 International Conference on Information Technology and Intelligent Control (CITIC 2021)

Time：31st July, 2021 (Sat.)　　ZOOM Conference ID：748 677 4340 (Password: 666666)

Time (GMT+8:00)	Agenda Items
12:55-13:00	**Opening Address**
Keynote Speeches	
13:00-13:40	***Keynote Speech 1: Analysis and Perception of Multimedia Data*** **Prof. Bingkun Bao** **Nanjing University of Posts and Telecommunications, China**
13:40-14:20	***Keynote Speech 2: A new theoretical framework of parameter estimation of linear systems*** **Prof. Zhihong Man** **Swinburne University of Technology, Australia**
14:20-15:00	***Keynote Speech 3: Recent and Future Research on Microgrid Clusters*** **Prof. Farhad Shahnia** **Murdoch University, Australia**
15:00-15:05	***Photography***
15:05-15:45	***Keynote Speech 4: Learning-Based Adaptive Optimal Control and Applications to Connected and Autonomous Vehicles*** **Prof. Weinan Gao** **Florida Institute of Technology, USA**
15:45-16:25	***Keynote Speech 5: Sparse SAR Imaging: From Theory to Practical Application*** **Prof. Hui Bi** **Nanjing University of Aeronautics and Astronautics, China**
Oral Presentations	
1-1	***An improved conical scaning tracking method in Satellite Communication Systems*** **Zhaowen Wang, Nanjing University of Posts and Telecommunication, China**
1-2	***Multi-focus Source Images Reconstruction based on Adaptive Regional Data Hiding*** **Meng-yao Liu, National Key Laboratory of Science and Technology on Space Microwave, Academy of Space Technology, China**
1-3	***Preliminary assessment of BeiDou Navigation Satellite System satellite orbit determination accuracy and positioning accuracy*** **Yutao Hu, National University of Defense Technology, China**

1-4	***A new near-lossless image information hiding algorithm with controlled hiding capacity*** **Yi Zhang, National Key Laboratory of Science and Technology on Space Microwave, China Academy of Space Technology**
1-5	***Partition Optimal Band Selection Method for Hyperspectral Image*** **Yuetao Pan, Dalian Minzu University, China**
1-6	***Improved Aspect-level Sentiment Analysis Method based on Multi-Head Attention Mechanism*** **Kaixuan Yu, Henan University, China**
