Abstract

The proceedings contain 115 papers. The topics discussed include: a revocable and key secure ciphertext-policy attribute-based encryption scheme based on blockchain; a board-level hardware trojan detection method; information security protection in hybrid office; design of network security protection network architecture for intelligent networked vehicles; supply chain financing risk identification and control under the Internet of Things financial model; vulnerability analysis method of network routing mechanism based on knowledge graph: vulnerability analysis and reinforcement verification mechanism of network routing mechanism based on knowledge graph; decoupled user preference enhanced fake news detection: investigating the function of decoupled user preferences in improving fake news detection algorithms; and a certificateless aggregate signature scheme without bilinear pairing.

Conference Information

Conference name: 3rd International Conference on Cyber Security, Artificial Intelligence and Digital Economy, CSAIDE 2024
Conference date: March 1, 2024 - March 3, 2024
Conference location: Nanjing, China
Conference code: 201273

Bibliographic Information

Issue date: March 1, 2024
Publication year: 2024
Language: English
Part number: 1 of 1
Abbreviated source title: ACM Int. Conf. Proc. Ser.
Issue title: Proceedings of 2024 3rd International Conference on Cyber Security, Artificial Intelligence and Digital Economy, CSAIDE 2024
Page count: 667
Abstract type: (Edited Abstract)

Compilation and indexing terms, © 2024 Elsevier Inc.
