9798350386974

Abstract

The proceedings contain 143 papers. The topics discussed include: research on intelligent extraction technology of unstructured test data; optimization of PID parameter tuning based on improved dung beetle algorithm; time delay estimation model and robot network control research; fusion of transformer and convolution for complex fault diagnosis; internet satellite information classification model based on contrastive learning and text quality awareness; multi-population random mean particle swarm optimization algorithm; self-adaptive multi-objective differential evolution for feature selection in classification; indoor UWB localization based on improved intelligent optimization algorithms; and personalized recommendation algorithm based on learning automata and product clustering.

Conference Information

Conference name: 6th International Conference on Internet of Things, Automation and Artificial Intelligence, IoTAAI 2024

Conference date: July 26, 2024 - July 28, 2024

Conference location: Guangzhou, China

Sponsor: IEEE

Conference code: 203060

Bibliographic Information

Issue date: 2024

Publication year: 2024

Language: English

Part number: 1 of 1

Abbreviated source title: Int. Conf. Internet Things, Autom. Artif. Intell., IoTAAI

Issue title: 2024 6th International Conference on Internet of Things, Automation and Artificial Intelligence, IoTAAI 2024

Page count: 733

Abstract type: (Edited Abstract)

Compilation and indexing terms, © 2024 Elsevier Inc.
