Abstract

The proceedings contain 290 papers. The topics discussed include: impact of digital modulation on optical fiber communication; a new data-free knowledge distillation method for non-IID federated learning; analysis and research on automatic text classification algorithm based on machine learning; RIS-aided dual-functional radar and communication system waveform optimization; application of ResUNet-CBAM in rock sheet image segmentation; research on AI chip large model inference testing technology; real-time automatic detection of motorcycle helmet based on improved YOLOv8 algorithm; a cardiac MRI segmentation method based on context cascade attention; research on high-precision displacement monitoring system based on GNSS; an adaptive MAC protocol for underwater acoustic networks based on deep reinforcement learning; and multimodal enhanced sentiment analysis with hierarchical feature extraction.

Conference Information

Conference name: 6th International Conference on Communications, Information System and Computer Engineering, CISCE 2024

Conference date: May 10, 2024 - May 12, 2024

Conference location: Hybrid, Guangzhou, China

Sponsor: IEEE

Conference code: 202514

Bibliographic Information

Issue date: 2024

Publication year: 2024

Language: English

Part number: 1 of 1

Abbreviated source title: Int. Conf. Commun., Inf. Syst. Comput. Eng., CISCE

Issue title: 2024 6th International Conference on Communications, Information System and Computer Engineering, CISCE 2024

Page count: 1554

Abstract type: (Edited Abstract)

Compilation and indexing terms, © 2024 Elsevier Inc.
