Abstract

The proceedings contain 122 papers. The topics discussed include: research on the regulatory framework and full-chain security protection scheme for OTA updates of intelligent connected vehicles; research on the construction of enterprise financial sharing platform in the background of cloud computing; design and implementation of financial risk prevention and control platform based on spark; research on the optimization of enterprise finance sharing center functions based on data mining; enhancing the security of word embedding in machine learning as a service against reverse engineering attacks using homomorphic encryption; research on the working principle and application of common contact-type perimeter intruder alarm detection technology in airports; and an adversarial attack defense method based on graph purification.

Conference Information

**Conference name:** 2025 4th International Conference on Cyber Security, Artificial Intelligence and the Digital Economy, CSAIDE 2025

**Conference date:** March 7, 2025 - March 9, 2025

**Conference location:** Kuala Lumpur, Malaysia

**Sponsor:** Universiti Teknologi Malaysia (UTM)

**Conference code:** 210357

Bibliographic Information

**Issue date:** July 1, 2025

**Publication year:** 2025

**Language:** English

**Part number:** 1 of 1

**Abbreviated source title:** Proc. Int. Conf. Cyber Secu., Artif. Intell. Digit. Econ., CSAIDE

**Issue title:** Proceedings of 2025 4th International Conference on Cyber Security, Artificial Intelligence and the Digital Economy, CSAIDE 2025

**Page count:** 779

**Abstract type:** (Edited Abstract)
