

往届 **2025** 年第六届医学人工智能国际学术会议(**ISAIMS2025**)
收录到 **EAI** 期刊的 **10** 篇论文题目如下:

1. 《Automatic Classification of Anterior Talofibular Ligament Injury Severity on MRI Using Attention-Based Mechanisms》
2. 《Transformer-based Mobile Health Text Analytics System: Intelligent Symptom Monitoring and Alert for Pervasive Healthcare Environments》
3. 《Fusion of Radiomics and Deep Learning Features for Enhanced Prediction of Neoadjuvant Chemotherapy Response in Breast Cancer》
4. 《RAG-TPC: Retrieval Augmented Generation for Teenager Psychological Counseling Using DeepSeek》
5. 《Enhancing Medical Question-Answering Systems with Knowledge Graph-Integrated Large Language Models: A Comparative Analysis》
6. 《An Interpretable Stacking Ensemble Model with SHAP for Geriatric Depression Prediction: Analysis of the NHANES 2005-2023 Database》
7. 《Design and Implementation of Intelligent Treatment Plan Recommendation System Based on Big Data of Orthodontic Cases》
8. 《Biomorphic Design of Age-Friendly Wearable Devices: Flexible Circuits and Self-Luminescent Display Interfaces Based on Vascular Bionic Structures》
9. 《Intelligent ECG Classification Based on Improved Swin Transformer Model》
10. 《ECG Signal Classification Method Based on Structural Risk Minimization》
